# Tips for Health Care Providers

- Get the person's attention and make eye contact.
- Repeat, rephrase or write down your request.
- Ask and/or indicate before touching the person.
- Ask the person their preferred method of communication.
- Minimize the number of people interacting with the patient.
- Know that hearing aids/cochlear implants may improve hearing but a person may still benefit from an assistive-listening device and still may not understand all that you say.
